Packaging

Leading Edge Detection

A QS18 adjustable-field sensor detects difficult-to-detect foil on flow wrapping machine.

Full Case Inspection

A Presence PLUS colour sensor ensures a bliss box has the correct number of bottles.

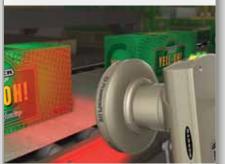

M18T temperature sensor detects the presence of hot glue before the flaps are closed.

Traceability

Date/Lot Code Verification

Prior to palletising, a sealed Presence PLUS vision sensor verifies a date/lot code has been printed.

Correct Label Verification

controller monitors all safety devices in a robotic palletiser. **Personnel Protection**

The iVu Bar Code Reader (BCR), with an integrated touch screen, reads a UPC and Data Matrix code to ensure the correct label is applied.

1D/2D Bar Code Reading

A stainless steel Presence PLUS vision sensor reads Data Matrix bar codes in washdown conditions.

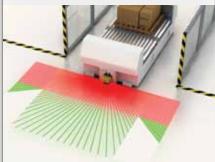

Safeguarding

Robotic Palletising Safeguarding

One configurable SC22-3 safety

A safety light screen protects employees from hazards on case erectors/sealers, case/tray packers and shrink wrapping systems.

Collision Avoidance

An AG4 two-dimensional safety laser scanner detects the presence of objects in the path of an automated guided vehicle (AGV).

High-Pressure, Washdown Rated

IP69K rated sensors are extremely durable in hostile environments. Rugged, sealed housings protect electronic components. These sensors are ideal for washdown applications in food/beverage and pharmaceutical processes.

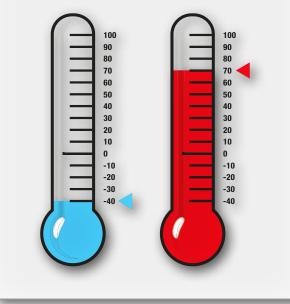

Ecolab certification

Devices that are designed for use in areas of industrial hygiene are highly exposed to cleaning processes. Ecolab is a leading manufacturer of cleaning agents, and in its function as independent body, certifies and implements resistance tests, whereby industrial automation products are exposed to cleaning processes.

ECSLAB

High and low temperatures

The EZ-BEAM family operates under extreme temperature conditions: temperatures go as low as -40° and up to $+70^{\circ}$ C with shocked temperature.

Chemically Resistant

Chemical-Resistant sensor models are protected with a PFA chemical-resistant jacket. The LEDs are visible through the translucent PFA cover.
