## Wireless Compost Probe

Full stainless steel  
1,5 meter probe

3 points of measurement  
every 0,5 meter to  
guarantee hygienization  
of compost

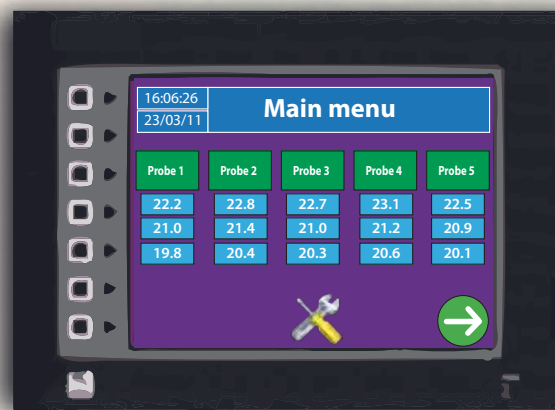

Sharp end point  
simplifies installation

- Cap cover and sun protection bracket
- GoreTex plug minimizes condensation
- Integrated rotary switches offer simple probe identification
- LED for radio link status
- Robust hanger
- Battery life up to 5 years

### Control Room

Radio Master can accommodate up to 48 probes in a single network and multiple networks can be collocated. The SureCross Performance Gateway offers network range up to 3 km with line of sight.

HMI options provide:

- Temperature visualisation for each probe
- Graphical history display for three days of temperature values
- On-board data archive
- PC interface for automatic upload of data to a central control location
