SCHOOL PRICE: 2796 €

Every machine is delivered with a Haas Control Simulator for classroom education.

⁽¹⁾ includes CE kit

Real CNC-machines at genuine school prices

In the more than 100 countries where Haas Automation operates, companies are fruitlessly looking for skilled CNC technologists to operate their businesses. Too few young people are attracted to manufacturing.

The key is to spark the interest of young students in CNC technology careers. With Haas' strong support in Europe and the Haas' affordable, hi-tech, real-industry CNC machine tools, you could be able to attract, excite and challenge the next generation of CNC specialists.

In addition to the above mentioned special school prices (15% off of standard list price) your school will receive with every Haas machine purchased:

- A Haas Control Simulator for classroom education
- 1 year extra full warranty

Haas Automation is cooperating with over thousand schools in the USA and Europe. We are ready to help you too, to improve your CNC training programs.

To find your local distributors, please call 00800 5005 5005 or go online to www.HaasCNC.com
